

Underdog Handcrafted Vaporizers

Aromatherapy Convection Vaporizers

Thank you for your purchase of an Underdog Vaporizer! Your Underdog (UD) is a high-tech, handmade work of art, and is one of the nicest, most efficient convection vaporizers money can buy. Each one is made and assembled, by hand, in the USA.

Since everyone uses their UD a little differently, there are no exact one-size-fits-all instructions, but we'll try to start you off with some helpful hints below. You can also visit underdogvapes.com/faq and youtube.com/user/UnderdogVapes for more tips.

By its very nature your vaporizer can get very hot to the touch while plugged in. Please be careful while handling it and the stems that come into contact with it. Don't touch the metal, as it will be very hot. Don't cover your UD while it's hot and be careful when vaping in bed or on the sofa, not to accidentally leave your vape in the blankets or let it fall in between the cushions.

Helpful Hints

- Plug in your UD and let it warm up for 10-20 minutes for **optimal** results. Position the extension cord between your vape and the power supply (or VVPS). Your extension cord protects your other more expensive cords from added movement and stress fatigue, as a sacrificial part that may need replaced from time to time. If using a VVPS, set voltage to 10.5v, and if using an UD adjustable power supply, set dial to 6. Then adjust up or down from there.
- When your vape is sufficiently warm, loosely grind up a bit of material and inhale it into the screen end of the stem. Don't overfill or tamp it down.
- Slide the stem and body carefully together; hold horizontally to keep material from falling out of the stem. Please note that glass and stainless steel tipped stems will fit loosely with the center tube, to account for heat expansion.
- Draw slowly, steadily and deeply through the stem to get the best vapor. To keep screens clean, blow out used material while still hot. If needed, take an empty, hot hit and blow through again. You can use the muslin bag to catch your ABV (Already Been Vaped) material.
- Lather, rinse, and repeat as necessary.
- Unplug and let cool before storing your Underdog. Turn the voltage off or down when not in use to extend its life.
- Above all, enjoy!

Packing List

- Vaporizer
- Adjustable Power Supply & Extension Cord
- Stems & Muslin ABV Bag
- Underbutter (wood conditioner to be used as often or as little as you like)

If Ordered:

- Accessories
- Goodies

Notes/Special Instructions
